

**PAMANTASAN NG LUNGSOD NG MAYNILA**  
**(University of the City of Manila)**  
**COLLEGE OF ENGINEERING AND TECHNOLOGY**

**INFORMATION TECHNOLOGY DEPARTMENT**

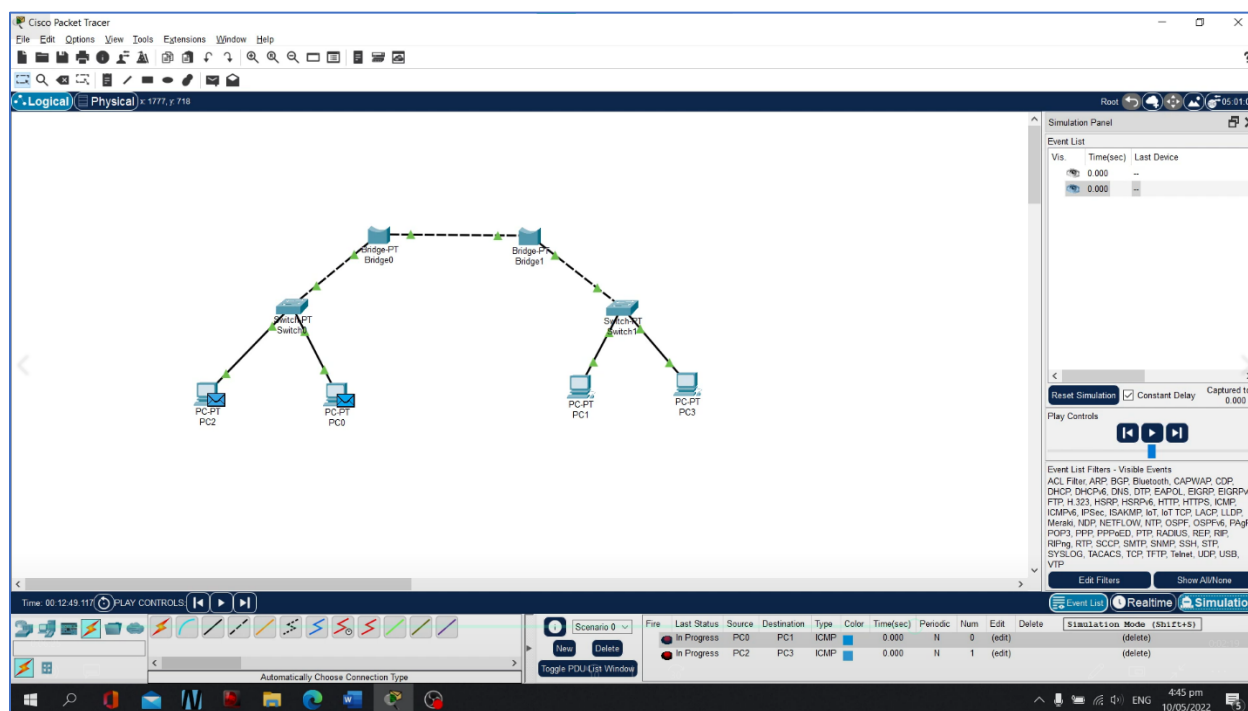

**WORKSHEET**

**Name:** Lauriaga, Joey E.  
**Course Year & Section:** BSIT 2-5

**ACTIVITY VI**

**Instruction:** Using Cisco Packet Tracer, create a video tutorial on how to use the different networking devices. Paste screenshots of your work on the space provided and answer the given question. Upload your work upon submitting this worksheet.

**Screenshot of your Work**

**How do you foresee the next generation of networking devices? Expound your answer.**

I do see that the future is wireless as this type of devices declutters our room and workspace. For example, wireless mouse and keyboard that lets you connect your laptop to an external monitor or to your television and you can now type from the couch while holding your keyboard and mouse. We might even see wireless connectivity of monitors, but that technology should withstand the threshold of gaming standards of today.
